Sprinkles

To minimize the amount of callers to the Sprinkles company in person locations

# CHALLENGES

# HEURISTIC EVALUATION

# VISIBILITY OF SYSTEM STATUS

- **Issue:** When selecting the pickup location, the user can't see how far away each store is from their location.
- **Solution:** Present the milage from the store to the users' location

# USER CONTROL AND FREEDOM

- **Issue:** It is difficult for the user to change from pick up to delivery after placing items in their cart because it will make them start over and the items in their cart are lost.
- **Solution:** Place both delivery and pickup options in the checkout process.

# CONSISTENCY AND STANDARDS

- **Issue:** When selecting the pick up option the user is redirected to a different page that is inconsistent with the theme of the landing page.
- **Solution:** Make the pages consistent.

# ERROR PREVENTION

- **Issue:** When inputting credit card information the user is able to use letters.
- **Solution:** Restrict the user to only using numbers for credit card details.

# FLEXIBILITY AND EFFICIENCY OF USE

- **Issue:** When selecting a pickup time the user is able to change it to a delivery instead, but the option is hard to find.
- **Solution:** Add the ability to switch from pick up to delivery on the same page.

# HELP AND DOCUMENTATION

- **Issue:** Due to their minimalistic design, the allergens and ingredients are not found easily. The user has to search for them.
- **Solution:** Make it easier to find by placing the ingredients in the description.

## FINAL DATE FOR COMMENTS

02/22/24

### PRODUCT UNDER TEST

What's being tested? What are the business and experience goals of the product?

Ordering 12 cupcakes

Order effectively, efficiently, and with a great experience for the user

Overall, the user experience was great with a score of 5 and 7 out of 10.

Business goals to increase the traffic on their website

Having a reliable and good reputation

### TEST OBJECTIVES

What are the goals of the usability test? What specific questions will be answered? What hypotheses will be tested?

Better customer experience by creating a smooth user interface.

To determine if the check out process is frustrating. Easy get to the point simple experience

How do we resolve this issue?

What specific elements on the UI are creating confusion for the user? Is the website easy to navigate?

Ordering 12 cupcakes.( can that be done smoothly)

### PARTICIPANTS

How many participants will be recruited? What are their key characteristics?

Celine: Preference for Convenience, quality conscious, flexible in choices

Gopakanya: curious, vegan, preference for pick up

### EQUIPMENT

What equipment is required? How will you record the data?

What equipment is required? How will you record the data? Tools: Macbook, Google chrome, Google docs, Timer, Zoom, wifi, sprinkles.com

### TEST TASKS

What are the test tasks?

Buy 12 cupcakes

1. Get on the website
2. To view what was available ( slides, pages)
3. Go to pick/delivery
4. Select desired product ( cupcake category)
5. Navigate new page
6. Check out the products ( viewing the different types of cupcakes)
7. Selecting the products (individual cupcakes)
8. Checking out

### RESPONSIBILITIES

Who is involved in the test and what are their responsibilities?

Customer: answer interview questions and navigate the website to buy 12 cupcakes. Share their experience.

Notator : Track Time on task,Number of steps to completion,Areas/points of frustration, Areas/points of satisfaction (and delight), Checkout as a guest or require login, Clarity of UI (user interface), Overall thoughts/rating of the experience

### BUSINESS CASE

Why are we doing this test? What are the benefits? What are the risks of not testing?

Reduce experience issues of customers calling

Benefits include reduced stress for workers in store

Better customer service from workers in store

Risks include losing business to competitors

Benefits the customer experience

### LOCATION & DATES

Where and when will the test take place? When and how will the results be shared?

02/22/24 on Zoom

10amPST

Google docs, slack, codetalk

Presenting our findings to the class

### PROCEDURE

What are the main steps in the test procedure?

Get demographic (individual interviews)

Tester goes through the website

Tester communicates their overall experience navigating the ui

Notator tracks the testers users experience.

Tester gave overall thoughts and ratings.

Notator gathered all information and organized it.

# INTERVIEWS & USER TESTING

**Have you ever ordered food online?**

Yes on her phone.

**Ask how long ago. (how often) (Desktop or mobile)**

On her phone, two days ago.

**If yes, ask from where.**

Pizza shop

**What did you like or dislike about the experience?**

Ordered through Uber Eats. Missing items. Service fees. Overall, okay experience.

**Have you bought cupcakes recently? From where?**

No, because of dietary restrictions. Makes her cupcakes or looks for a vegan shop.

**Did you enjoy your experience? Why or why not?**

Yes, the packaging was cute.

**Do you shop from a bakery or online?**

Bakery because of her diet. If ordered online they might look different than what it looks like on the website.

**Delivery or pick-up? Why?**

Pick up because she wants to make sure that everything goes smoothly.

# TESTING #1

## Time on task

4min 45sec

## Areas/points of satisfaction

Pretty and inviting landing page

## Number of steps to completion

28 steps

## Clarity of UI (user interface)

Added the cupcakes to her cart, but when checking out they weren't there. Where did they go? Easy to find and place them in the cart.

## Areas/points of frustration

Items are not added to the cart after clicking the plus symbol. Limited vegan options.

## Overall thoughts/rating of the experience

Nice website. More vegan options. Experience is a 5/10. Visually appealing. Both log-in and guest checkout are available.

**Have you ever ordered food online?**

Yes, she got Jack-in-the-box recently.

**Ask how long ago. (how often) (Desktop or mobile)**

On her phone, four days ago.

**If yes, ask from where.**

Uber Eats

**What did you like or dislike about the experience?**

Quick and convenient. The food arrived hot. Missing items, but due to user error.

**Have you bought cupcakes recently? From where?**

Not recently, but she did buy a birthday cake in September from Paris Baguette.

**Did you enjoy your experience? Why or why not?**

The workers were busy/overwhelmed so it did not allow her to get the best experience.

**Do you shop from a bakery or online?**

A bakery because it has more variety and tastes fresher.

**Delivery or pick-up? Why?**

On special occasions, she prefers pick-up to ensure the food is up to standards. For everyday delivery is best.

# TESTING #2

## Time on task

5min 50sec

## Areas/points of satisfaction

Great visuals.  
Aesthetic design.

## Number of steps to completion

50 clicks

## Clarity of UI (user interface)

Straight forward and clear.  
She did not have any  
challenges until the end.

## Areas/points of frustration

When adding cupcakes the  
quantity is not shown at  
checkout. No warning for same-  
day pick-up cupcake availability.

## Overall thoughts/rating of the experience

7/10 as it didn't feel cluttered, has good  
visuals and is easy to navigate. Both  
log-in and guest checkout are available.

# USER PERSONA

## Dianne Cyrus

### Demographic

Age: 52  
Sex: F  
Occupation: Event  
Planner

### Bio

Tech-savvy event planner orchestrating unforgettable celebrations while spoiling grandkids rotten. Passion for parties runs deep, making life one big fiesta! 🎉  
#EventPlannerExtraordinaire #GrandmaGoals

### Personality

- Balances event planning expertise with spoiling her grandkids, embodying a mix of family love and professional skill.
- Radiates warmth and charm, effortlessly connecting with clients and grandchildren alike, showing genuine care.
- Balances professionalism with playfulness, earning admiration as #GrandmaGoals in both her work and family circles.

### Pain Points

- Busy woman balancing work-life balance.
- Client Expectations
- Physical Demands

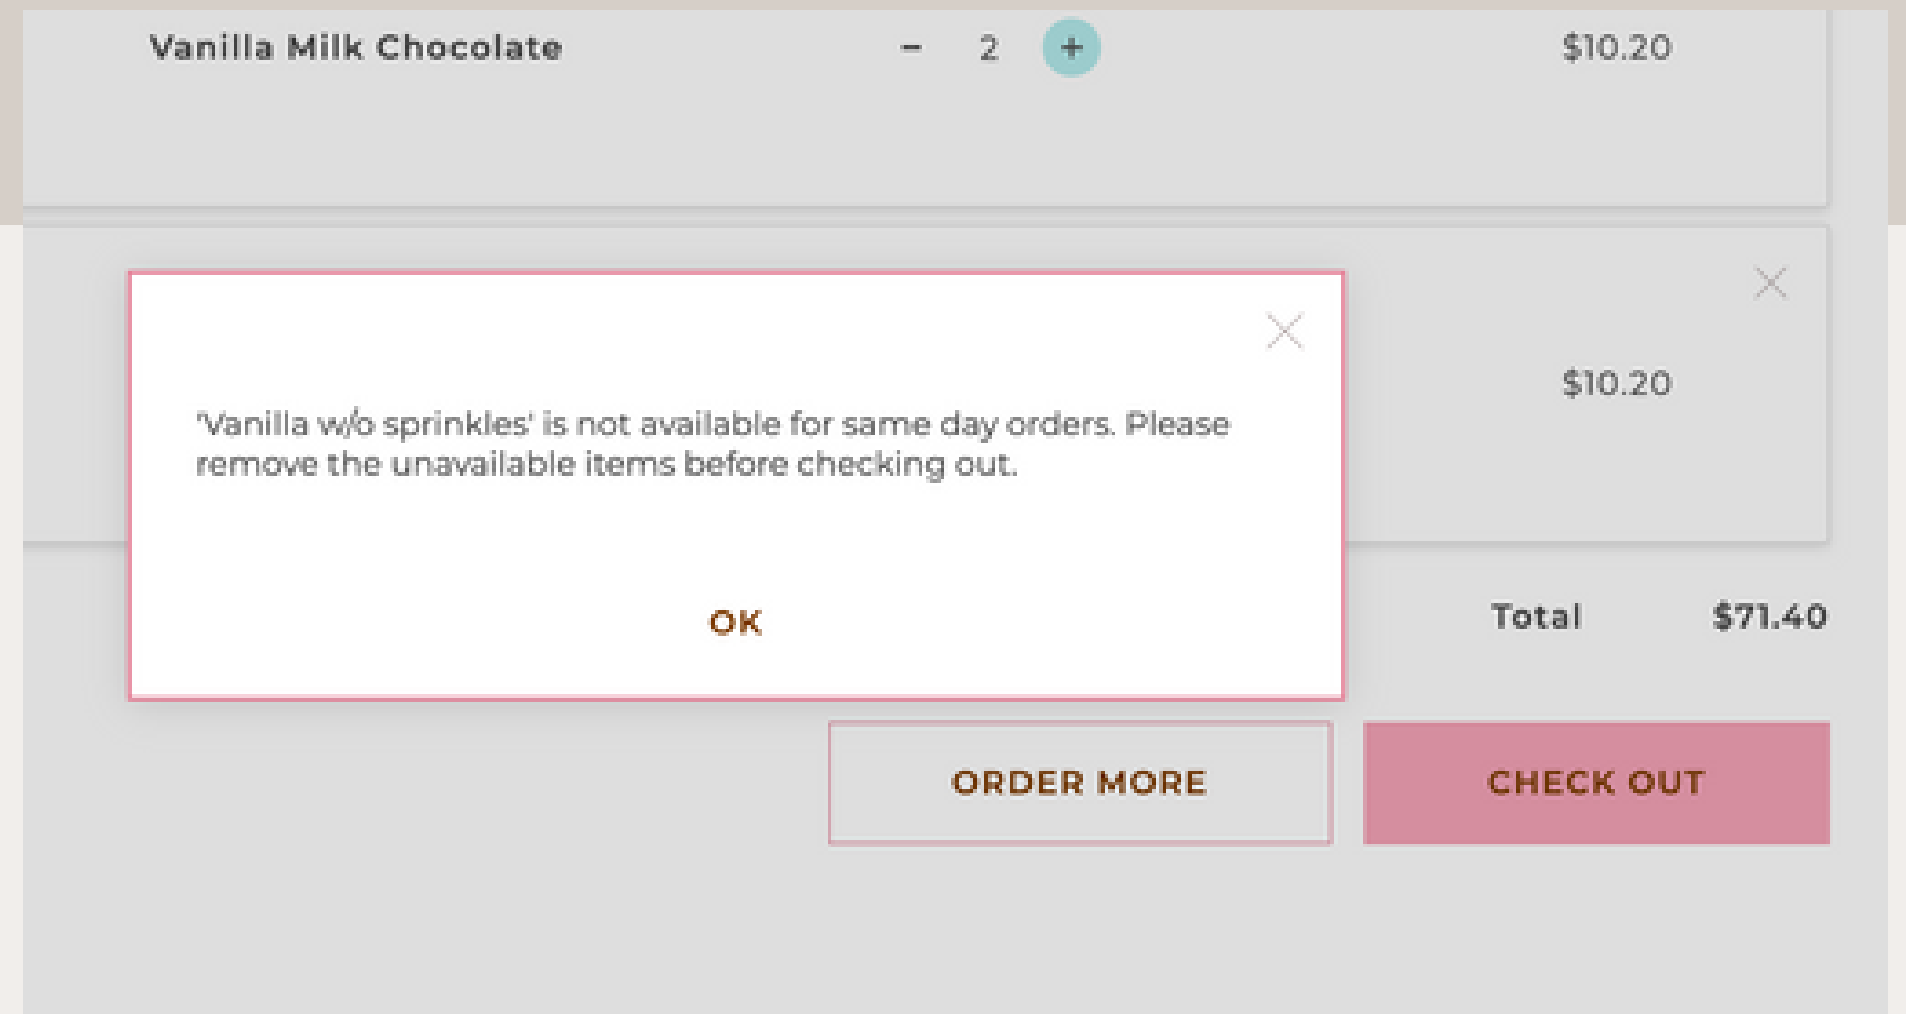

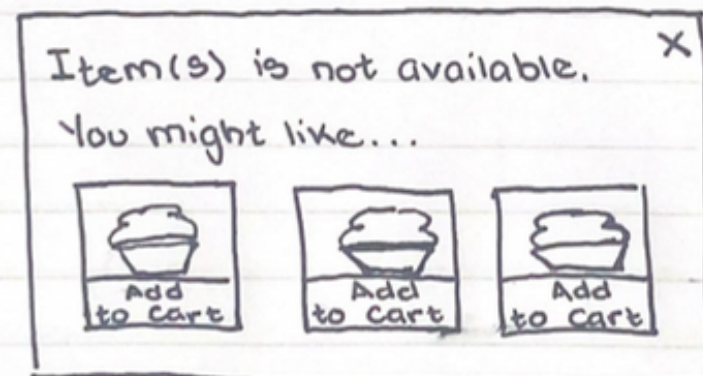

# DESIGN SOLUTIONS

Issue 1

Problem: When checking out an error message pops up stating that some items in the cart are not available. As a result the customer has to go back and edit their cart / make new selections.

Solution: Add a list of suggestions that the customer can choose from.

	Vanilla	- 2 +	\$10.20
			\$10.20
			\$10.20
<b>Total</b>			<b>\$71.40</b>

Uh oh! Vanilla w/o sprinkles and Chocolate with sprinkles is currently not available.

# FINAL TESTING

Our Prototype

# NEXT STEPS

After researching the users' issues and coming to a solution the prototypes are ready to be sent out to the developers.

We believe that our designs are the best and most efficient to be implemented. We noticed the website is in ongoing redesign and these were the biggest issues we faced.
